

# Tom Sampson

BSc (HONS) MRICS

Partner, Building Consultancy

07890 586871

tom.sampson@bidwells.co.uk

**Tom has vast experience of repurposing property into award-winning facilities. From old fire stations to unused air traffic control towers, he's done it all.**

Putting his experience in the education sector to use, Tom played an instrumental role in redeveloping St. Hilda's College's £20m riverside site in Oxford city centre. Tom is currently working with University of Oxford on their Home for Information, Engineering, Computer Sciences and Digital Health.

The projects that Tom works on are nothing short of exceptional. Prior to Bidwells, Tom worked on Stratford-upon-Avon's Royal Shakespeare Theatre, consulted on part of London's Olympic Park, and supported the Department for Education on their various school improvement programmes.

Now an asset within our Oxford Project Management team, Tom is heavily involved in the Ashmolean Museum's plans to redevelop their City Centre site and Oxford Sciences Innovation on numerous fit-out projects. These impressive laboratory facilities are used to conduct different types of research, among them finding cures for cancer.

In addition to being a member of RICS, Tom is an APC supervisor for budding surveyors across Bidwell's Oxford and Cambridge offices.

## Key relevant project experience

### Cheltenham Ladies College

Project Manager of new Sixth Form Hub and Boarding House with an overall project value of £26m.

### Frontier Estates

Project Manager for new, mixed-use development for Frontier Estates including care homes, doctor's surgery, nursery, retail and residential accommodation totalling £28m.

### Jaguar Land Rover

Lead consultant for multi discipline team on a £90m development centre. Tom managed both Jaguar Land Rover and the design team from feasibility stage through to the completion of the Stage 3 design and then procurement and construction.

### St Helens and St Katherines School

Project management of the new sixth form centre (£8m) and sports pavilion (£1.5m).

### Aston Martin

Responsible for development of the new design studio and fit out (£3.4m).

### Boeing Defence UK

Team manager for new HQ and engineering facility – a £120m project.

**“Their careful stakeholder management is invaluable in the delivery of our projects. We wouldn't want to undertake a project without them.”**

**Pete Wilder, Head of Property at Oxford Sciences Innovation**
